

Noise incident record

A structured example of the kind of timeline SilentProof can export for a landlord, property manager, or follow-up file.

ILLUSTRATIVE SAMPLE - every person, address, event and reading below is fictional.

3	92 min	Aug 8-12
logged incidents	total observed duration	sample date range, 2026

REPORT ID	SP-SAMPLE-2026-0813 - generated for demonstration
LOCATION	Bedroom, Sample Building - exact source unknown
PURPOSE	Document a recurring late-night pattern for building-management review

Incident timeline

Date & time	Duration	Observation	Impact / follow-up
Aug 8 11:42 PM	24 min	Repeated heavy impacts and furniture-like scraping audible from the ceiling area. Windows closed.	Woke from sleep. No contact made during the incident.
Aug 10 12:07 AM	31 min	Intermittent impacts in six clusters from the same perceived area. Exact source unknown.	Moved to living room. Building portal ticket SAMPLE-1042 opened.
Aug 12 11:55 PM	37 min	Impacts and scraping recurred after several quiet intervals. Same phone position and room conditions.	Sleep delayed. Added factual follow-up to SAMPLE-1042.

Reference readings and record boundaries

The values below are fictional demonstration data. A phone reading adds context to a timeline; it does not establish who caused a sound or whether an ordinance was violated.

Metric	Aug 8	Aug 10	Aug 12	How to interpret it
Phone reference range	41-63 dB	42-66 dB	40-64 dB	App-reported range from one repeatable position; not a certified meter result.
Quiet baseline	36 dB	37 dB	36 dB	Short comparison reading in the same room after the event ended.
Placement	Bedside table	Bedside table	Bedside table	Same iPhone, case unchanged, microphone openings unobstructed, windows closed.

THIS REPORT CAN ORGANIZE	THIS REPORT DOES NOT PROVE
Dates, start/end times, durations, room conditions, neutral notes, phone reference levels, and follow-up identifiers.	Source identity, legal liability, lease breach, ordinance violation, certified calibration, admissibility, or an enforcement outcome.

Handling and verification notes

1	Audio is not embedded in this PDF. Any audio remains a separate local file unless the user explicitly shares it.
2	Recording and privacy rules vary. Before capturing or sharing identifiable speech, verify the current law for the facts and locations involved.
3	A real export should preserve the original incident timestamps and identify later corrections rather than silently rewriting an observation.
4	SilentProof does not submit a landlord complaint or government service request and does not guarantee review, enforcement, or any legal outcome.
